JAL STRATEGIES

Disciplined Real Estate Investing, Development & Capital Formation

QUEENSTOWN HARBOR

Land Development & Lot-Monetization Partnership

Entitling and monetizing the developable land around the River & Lakes courses

Queenstown, Maryland · Eastern Shore · 36 holes on the Chesapeake

Preliminary discussion document — not a final proposal or commitment. Figures compiled from public sources and independent research; subject to change and confirmation in further conversations.

THE OPPORTUNITY

Monetize the land. Return capital to your investors.

Bob — Capital H6 bought these courses with ~1,000 acres at a near-zero land basis. The resort runs itself; the upside is the land — entitle it and sell entitled lots to builders (they fund the horizontal), returning capital to the investors who are owed their pref.

$25M
Just acquired (May 2026)
Queenstown + South River, via Capital H6

~1,000 ac
Near-zero land basis
Land across the portfolio — that's the upside

Capital-light
Entitle & sell lots
Builder funds the horizontal; we fund soft costs

Liquidity
For your investors
Lot sales return capital against the 8% pref

WHY NOW

Monetize the land to get your investors their capital back.

Near-zero basis: ~1,000 acres came with the golf-course buys — the land value is pure upside.

Capital-light: entitle the parcels and sell entitled lots; the builder funds the roads, sewer & utilities.

Your investors are owed an 8% pref and have seen no cash yet — lot sales return their capital.

And it repeats — a steady pipeline of family-owned courses keeps coming to Josh.

Sources (own research; subject to change & confirmation): Club + Resort Business · Eye On Annapolis

THE ASSET

Queenstown Harbor, by the numbers.

A 36-hole waterfront destination on Maryland's Eastern Shore — acquired from The Brick Companies in May 2026, with established golf, an event venue and cottages already in place.

River	**Course · par 72**	Lindsay Ervin design · 7,096 yds · opened 1991
Lakes	**Course · par 71**	Lindsay Ervin design · 6,569 yds · opened 1996
310	**Links Lane, Queenstown MD**	Chester River at the Chesapeake Bay
$25M	**Acquired with South River**	From The Brick Companies · via Capital H6

ALREADY IN PLACE

An operating resort — not a raw land play.

River House & Tavern — newly renovated wedding, event and corporate venue.

On-site cottages — existing overnight lodging and a hospitality base.

36 holes of championship golf since 1991 — traffic, brand and demand already here.

198 acres under permanent conservation — stewardship credibility, and an envelope to plan around.

Sources (own research; subject to change & confirmation): qhgolf.com · GolfDigest · VisitMaryland

THE LAND BANK

The upside is the land around the golf.

The resort operates; the value-creation is entitling the non-conservation acreage and selling entitled lots to builders — capital-light, the builder funds the horizontal — additive to the hospitality.

870+ ac
Portfolio land
Across Queenstown + South River

198 ac
Under conservation
Permanent easement at Queenstown — plan around it

~140 ac
Developable land
Net of conservation, wetlands & course (to verify)

~280
Entitled lots
Sold to regional homebuilders

THE THESIS

Monetize the land the golf doesn't need.

Identify developable parcels at the course edges — away from conservation, wetlands and play.

Entitle and sell entitled lots — the builder funds the horizontal (roads, sewer, utilities) and builds.

Golf-frontage and water-view lots command premium pricing and faster absorption.

Recycle proceeds into the broader Capital H6 program — including South River.

Sources (own research; subject to change & confirmation): Club + Resort Business · qhgolf.com/who-we-are

THE PLAYBOOK

Four moves that turn land into cash.

Capital-light: entitle the land (soft costs only), sell entitled lots to builders who fund the horizontal, then recycle into the next parcel — and the next property.

01

Entitle

Approvals for lots

Secure zoning and subdivision approvals for the developable acreage around the fairways — soft costs only.

02

Sell Entitled Lots

Entitled lots → builders

Sell entitled (approved) lots to builders — they fund the horizontal (roads, sewer, utilities) and build the homes.

03

Golf & Water Premium

Frontage sells higher

Lots on a course or with Chesapeake water views command a premium and absorb faster.

04

Recycle & Repeat

Parcel — then property

Roll proceeds into the next parcel, and run the same playbook across the Capital H6 pipeline.

Move 01 is mostly soft costs — the fastest path to proof, and to first cash.

THE MATH · ILLUSTRATIVE

From 700 acres to ~$19.6M of entitled-lot revenue.

Capital-light entitled-lot basis: we entitle the land and sell entitled lots; the builder funds the horizontal. ~280 lots at ~$70K = ~$19.6M revenue. Net profit & the 50/50 split are on the pro forma. Illustrative — survey-dependent.

Step	Basis	Calculation	= Result
Gross Queenstown land	per ownership (to confirm)	—	**~700 ac**
Less permanent conservation	recorded easement	700 − 198	**502 ac**
Less golf, range, water & lodging	two 18s + 9-ac range + cottages	502 − ~300	**~200 ac**
Less Critical Area & wetlands	Chesapeake 1,000-ft zone	200 − ~60	**~140 ac**
Entitled lots	~2.0 lots / acre	140 × 2.0	**~280 lots**
Entitled lot price	to a builder (they finish)	≈ $150K − ~$80K	**$70K**
GROSS ENTITLED-LOT REVENUE	net profit & 50/50 split on the pro forma	280 × $70K	**$19.6M**

~$19.6M entitled-lot revenue on ~$5.3M of soft cost → ~$14.3M profit — the builder funds the horizontal. Split & returns on the pro forma.

Sources (own research; subject to change & confirmation): qhgolf.com/who-we-are · Queen Anne's Co. — Critical Area · MD DNR — Critical Area

WHY IT SELLS

These lots sell — here's why.

Course and water frontage, Bay Bridge proximity, and builder appetite for entitled lots all push price and absorption. We're meeting demand that already exists.

Driver	Detail	Why it lifts value
Golf & water frontage	Lots on the River / Lakes courses & Chester River	Premium pricing and faster absorption vs. a raw subdivision
Bay Bridge location	Minutes to Annapolis; ~1 hr to D.C. & Baltimore	Commuter, second-home and weekend demand from three metros
Chesapeake scarcity	Limited new waterfront-adjacent lots on the Shore	High barriers → durable, premium lot values
Builder appetite	Regional homebuilders want entitled / finished lots	They pay to avoid entitlement risk — and fund the infrastructure
Fresh owned basis	$25M for 870+ ac just closed	Low land basis → development margin starts higher

Sources (own research; subject to change & confirmation): distance-cities.com · Queen Anne's Co. — Critical Area

Demand is already here — we're entitling supply to meet it, not creating a market.

THE SISTER ASSET

South River — the Annapolis-side anchor.

Acquired in the same $25M Capital H6 deal: an established 18-hole private club near Annapolis with 600+ member families — a membership and events engine, and the next place to run the playbook.

18 holes	**Private club (Brian Ault, 1996)**	Edgewater, MD — on the South River
600+	**Member families**	Recurring dues + a built-in events base
165 ac	**Club grounds**	8 lakes · 14 environmentally protected areas
Same deal	**Part of the $25M H6 buy**	One platform, two assets

THE ANGLE

Membership and events first; land where diligence supports it.

600+ member families — recurring dues, plus an events / dining base to grow.

Annapolis-side, west of the Bay — an affluent, supply-constrained catchment.

The Bistro, fitness, simulator lounge & range already drive non-golf revenue.

Assess limited parcel entitlement without disturbing the member experience.

Sources (own research; subject to change & confirmation): golfclubsr.com · foretee.com · Club + Resort Business

THE FIRST DEAL · RENAULT WINERY

Renault — the first deal, and the site visit.

Renault Winery (Egg Harbor City, NJ — ~25 min from Atlantic City) is the lead property and where we'll meet. The township has offered land for ~34 lots overlooking the course, a +100–200-room hotel expansion is planned, and the architect is already mapping lots.

~34 lots	**Township-offered land**	Overlooking the golf course
+100–200	**Hotel rooms planned**	Expansion off the back of the resort
~25 min	**From Atlantic City**	Where I'll meet Bob & Josh
In motion	**Architect mapping lots**	Underway since the last meeting

WHY RENAULT FIRST

Josh's original property — the proof case for the playbook.

The township has offered additional land for ~34 lots; the architect is already boxing them out.

A required hotel expansion (+100–200 rooms) layers hospitality on top of the lot sales.

The winery already runs a lake & campground profitably — operating upside beyond golf.

Closest asset to walk — ~25 minutes from Atlantic City airport; the natural place to start.

THE PIPELINE · NOT A ONE-OFF

One playbook, a portfolio of properties.

This isn't a single deal. Family-owned golf courses keep coming to Josh — bought at or below appraisal, each with monetizable land. The same capital-light playbook runs across the portfolio; Bob is negotiating the development rights.

Property	Status	The land opportunity
Renault Winery	**NJ · first deal**	~34 township-offered lots + a +100–200-room hotel expansion
Queenstown Harbor	**MD · this proposal**	~280 entitled lots around the 36 holes (~1,000 ac, ~zero basis)
The Golf Club at South River	**MD · operating**	Profitable club — appraised ~2× the purchase price
Kent Island	**MD · venue**	Clubhouse / event venue — Palantir rented it for a week
Colorado course	**Off-market**	Not yet on the website; equity needed to acquire
Virginia (1–2 courses)	**Offered to Josh**	Family-owned courses seeking a well-regarded operator

A steady train of undervalued courses → monetizable land. Same capital-light playbook each time — and the buys are extraordinary (South River at half appraisal; tax-structured for ~50% bonus depreciation).

DEVELOPMENT PLAN

Entitle the land. Sell entitled lots.

Capital-light: we fund only the soft costs to entitle the land, then sell entitled lots to builders who fund the horizontal. ~$5M of cost, not ~$25M — and the builder carries the construction risk.

~$5M

Total cost (soft only)

Entitlement, civil, environmental, legal, PM

$0

Horizontal we fund

The builder funds roads, sewer & utilities

THE PRINCIPLE

Stay light; let the builder build.

We fund only the entitlement and sell entitled lots — the builder funds the horizontal and the homes. Far less capital and no construction risk, on land carried at ~zero basis.

Phase	Approach	Capital	Who funds
Phase 1 — Entitle	Approvals for lots	**~$4M soft**	We fund (soft costs only)
Phase 2 — Sell lots	Entitled lots → builders	**Builder**	Builder funds the horizontal
Phase 3 — Recycle	Costs repaid, then 50/50	**Self-funding**	Proceeds → investors + next parcel

We stay capital-light — fund the entitlement, sell entitled lots, let the builder build. Costs repaid, then a simple 50/50.

PRO FORMA · ILLUSTRATIVE

The budget, and the 50/50.

Capital-light entitled-lot pro forma: we fund ~$5.3M of soft costs to entitle the land and sell ~280 entitled lots at ~$70K (~$19.6M). The builder funds the horizontal. Costs repaid, then a straight 50/50. Illustrative.

USES OF CAPITAL · SOFT ONLY	
Soft costs — entitle the land	**$4.0M**
Marketing & brokerage (~3%)	**$0.6M**
Contingency (10% of soft)	**$0.4M**
Financing / carry	**$0.3M**
TOTAL DEVELOPMENT COST	**$5.3M**

KEY ASSUMPTIONS

$70K entitled lot · 280 lots · builder funds the horizontal · land at ~zero basis · costs repaid, then a straight 50/50 (no pref, no promote)

THE 50/50

$14.3M

net profit

Costs repaid first, then a straight split:

Property / H — 50%

$7.2M · Josh ~$3.6M → returns capital to your investors

Development co — 50%

$7.2M · Bob · JAL · partners (JAL earns a share)

RETURNS

$19.6M
Entitled-lot revenue

$14.3M
Net profit (73% margin)

~86%
Project IRR (unlevered)

2.7×
Return on cost (~$5.3M)

$7.2M
Development co (50%)

$7.2M
Property / investors (50%)

Illustrative: ~$14.3M profit on ~$5.3M of soft cost — ~2.7× on cost and a ~86% unlevered IRR on a near-zero land basis. Builder funds the horizontal; costs repaid, then a straight 50/50.

PRO FORMA · BASIS & SOURCES

What the pro forma assumes — and why.

Every input, its value, and the reasoning. Market figures are from public sources; deal-specific figures (acreage, land basis, density) are to be confirmed in diligence.

Assumption	Value	Basis / reasoning
Net developable acreage	**~140 ac**	700 gross – 198 conservation – ~300 golf – ~60 Critical Area; survey to confirm
Lot density	**~2.0 / ac**	Blended for the developable (non-Critical-Area) land; Queen Anne's County zoning to confirm
Entitled lot price	**$70K**	≈ finished lot $150K less the builder's ~$80K to finish (horizontal + margin); confirm vs builder bids
Soft costs (entitle)	**~$4.0M**	Entitlement / approvals, civil & environmental, legal / survey, project management
Horizontal	**Builder-funded**	Roads, sewer & utilities funded by the builder — not us (capital-light)
Land basis	**~zero**	Contributed at a near-zero basis — the land came with the $25M H6 acquisition
Structure	**Straight 50/50**	Costs repaid, then 50% property / 50% development co — no pref, no promote

Sources (own research; subject to change & confirmation): Land.com — QAC lots · Zillow — QAC new homes · HomeGuide — land dev cost · Club + Resort Business

THE DEAL · HOW PROFIT SPLITS

A straight deal — 50/50, no waterfall.

Bob's structure, kept simple: revenue comes in, costs are repaid, then profit splits 50/50 — half to the property owner (the H entities; Josh owns 50%), half to the development company. No pref, no promote tiers.

$19.6M

Entitled-lot revenue

~280 lots × ~$70K

($5.3M)

Less: costs repaid

the soft costs we funded

$14.3M

Net profit to split

≈ 2.7× on cost

PROPERTY / H ENTITIES

50%

$7.2M

Josh owns 50% of each property → ~$3.6M (≈ 25% of profit). This is the liquidity that returns capital to his investors against their 8% pref.

DEVELOPMENT COMPANY

50%

$7.2M

JAL's share 30% → ~$2.1M

Accountable Equity / Capital H6 · Bob · partners take the balance. JAL = sweat equity + $15K/mo — no capital required.

Costs repaid, then a straight 50/50 — half returns capital to your investors, half to the development company. No pref, no promote, no 50-page waterfall.

SENSITIVITY · PHASE 1 PROFIT

How robust is the profit?

Net project profit ($M) across the entitled-lot price and the lot yield — the two swing factors. The base — $70K lots, ~280 of them — pencils to ~$14.3M; even conservative pricing holds double-digit millions. Split 50/50.

NET PROFIT $M (price / lots)	240 lots	280 lots	320 lots
$55K / lot	$8.1M	$10.2M	$12.4M
$70K / lot (base)	$11.6M	**$14.3M**	$17.0M
$85K / lot	$15.1M	$18.4M	$21.7M

Base $70K × 280 → ~$14.3M profit, split 50/50. The downside still clears ~$8M; stronger pricing or yield pushes past $20M.

Net project profit ($M); each cell re-runs the model. Half flows to the property (investor liquidity), half to the development company. Illustrative.

LOT LIQUIDITY · BUYER UNIVERSE

A deep pool of lot buyers.

Regional and national homebuilders are actively building across Queen Anne's County and the Eastern Shore. Entitled, finished lots trade readily — multiple credible takeout buyers let us run a competitive process and de-risk the exit.

Builder	Reach	Footprint / relevance
NVR / Ryan Homes	**National · public**	Largest builder in Maryland; routine acquirer of finished / entitled lots
D.R. Horton	**National · public**	#1 U.S. homebuilder; active Maryland operations
Lennar	**National · public**	Top-3 U.S. builder; Maryland division
Cole Homes	**Regional · local**	Named by Bob — active local to the Renault / Atlantic City market
Lacrosse Homes	**Regional**	Centreville, Queen Anne's Co. — Meadow Creek, Kent Island Estates
Caruso Homes	**Regional**	Eastern Shore communities + build-on-your-lot across Maryland
Gemcraft Homes	**Regional**	Mid-Atlantic production builder (MD · DE · VA · PA)
Bay to Beach · Baldwin Homes	**Regional · custom**	Eastern Shore custom / semi-custom builders

Multiple well-capitalized buyers = a liquid exit — entitled-lot takedowns or a bulk sale, marketed competitively.

Sources (own research; subject to change & confirmation): Lacrosse Homes (Centreville, QAC) · Caruso Homes · Gemcraft Homes · Zillow — MD new communities

PHASE 2 · HOTEL REQUIRED · ILLUSTRATIVE

Phase 2 — the hotel (a required component).

The hotel is required (per Bob) — at Renault the plan is +100–200 rooms; at Queenstown a 120-key resort & spa is already designed (FILLAT+). VIVÂMEE operates; JAL leads capital formation. Build-to-core, recapitalizing at stabilization (~Yr 4), clears a mid-to-high-20s return.

DEVELOPMENT COST	
Hotel (100 keys × $325K)	**$32.5M**
Restaurants (16K SF × $550)	**$8.8M**
Land — hospitality parcel	**$2.0M**
Soft / FF&E / pre-opening	**$3.7M**
TOTAL DEVELOPMENT COST	**$47.0M**

STABILIZED NOI		YoC
Hotel NOI	**$2.8M**	8.6%
Restaurant NOI	**$1.0M**	11.5%
STABILIZED NOI	**$3.8M**	8.1%

KEY METRICS

Build-to-core: recap / sell ~Yr 4 · 7.5% exit cap → ~$62M · 65% LTC · premium NOI (VIVÂMEE) · ~2.4-pt development spread · land contributed

RETURNS

$47.0M
Total project cost

$4.7M
Premium NOI (build-to-core)

9.9%
Yield on cost (premium)

~2.3×
Equity multiple (~4-yr)

~28%
Build-to-core IRR

Built to core (recap at stabilization), the hotel clears ~28% IRR / ~2.3×. Held for income it's ~12% — the spread is the contributed land + VIVÂMEE's premium NOI.

Sources (own research; subject to change & confirmation): FILLAT+ — resort design · HVS — hotel dev cost 2025 · hotel cap rates 2025 · restaurant build cost

SENSITIVITY · PHASE 2 BUILD-TO-CORE

How robust is the hotel return?

Build-to-core IRR (65% LTC, recap at stabilization) across stabilized NOI and exit cap — the two biggest swing factors. Base ($4.65M NOI, 7.5% cap) → ~28%; it holds in the mid-20s+ as long as NOI lands and caps stay sub-8%.

BUILD-TO-CORE IRR (NOI / cap)	7.0% cap	7.5% cap	8.0% cap	8.5% cap
$4.2M NOI	24.1%	19.8%	15.6%	11.6%
$4.65M NOI (base)	31.7%	**27.6%**	23.7%	19.9%
$5.15M NOI	38.8%	34.8%	31.1%	27.5%

Base ~28%. Strong NOI + a sub-8% cap → low-to-high 30s; soft NOI or an 8.5% cap pulls it toward the high-teens / low-20s.

Build-to-core project IRR (65% LTC, recap ~Yr 4). VIVÂMEE-led; JAL leads capital formation. Each cell re-runs the model. Illustrative.

PHASE 1 · CASH FLOW

Phase 1 — entitled-lot cash flow.

Capital-light entitled-lot project cash flow ($M). We fund the soft costs to entitle (Yr 0–2); entitled lots sell as approvals land (Yr 2–4). Net profit ~$14.3M, then split 50/50. Illustrative.

$M	Yr 0	Yr 1	Yr 2	Yr 3	Yr 4	Total
Entitled-lot revenue	—	—	4.9	7.8	6.9	**19.6**
Less: soft costs (entitle)	(1.6)	(2.4)	(1.0)	(0.3)	—	**(5.3)**
Net project cash flow	**(1.6)**	**(2.4)**	**3.9**	**7.5**	**6.9**	**14.3**
Cumulative cash flow	(1.6)	(4.0)	(0.1)	7.4	14.3	

Net profit ~$14.3M on ~$5.3M of soft cost — ~2.7× on cost, ~86% unlevered project IRR; the builder funds the horizontal. Costs repaid, then a straight 50/50.

Project cash flow; illustrative phasing. The builder funds the horizontal. Ties to the model's entitled-lot sheet. Figures subject to confirmation.

PHASE 2 · BUILD-TO-CORE CASH FLOW

Phase 2 — build-to-core equity cash flow.

Hospitality build-to-core, levered equity cash flow ($M). Build to ~$47M cost at 65% LTC; stabilize at the premium NOI; recap / sell at ~Yr 4 (~$62M @ a 7.5% cap). VIVÂMEE operates. Illustrative.

$M	Yr 0	Yr 1	Yr 2	Yr 3	Yr 4	Total
Equity invested	(8.2)	(8.2)	—	—	—	**(16.4)**
Operating cash flow (after debt)	—	—	1.0	2.5	2.5	**6.0**
Recap equity (sale − loan)	—	—	—	—	31.5	**31.5**
Net equity cash flow	**(8.2)**	**(8.2)**	**1.0**	**2.5**	**34.0**	**21.1**
Cumulative cash flow	(8.2)	(16.4)	(15.4)	(12.9)	21.1	

~$16.4M equity → ~$21M net; build-to-core (65% LTC) levered IRR ~28% / ~2.3× at the Yr-4 recap (~$62M on ~$47M cost). Ties to the model's build-to-core sheet.

Levered equity cash flow — the line that drives the ~28% IRR; recap / sale at stabilization. A 120-key resort & spa is already designed (FILLAT+). Illustrative.

CAPITAL ACCESS

I bring the capital relationships.

When a parcel does call for equity or debt — or to move faster — here's the access. Active mandates, not a paper Rolodex.

$15M	**Equity being raised now**	Houston retail — family-office capital, closing summer 2026
$19.5M	**Debt already secured**	Lender committed on the same transaction
Mid–high 20s	**Target development IRR**	Investors expect mid-to-high 20s out-of-state
$6.1B	**Career transaction volume**	Across debt & equity — Blackstone + Levcor

THE NETWORK

Where I place capital — equity and debt.

Family offices (Texas) — my core equity base; they'll travel for the right risk-adjusted return.

Institutional equity — private-equity fund relationships.

National debt — relationships across national bank platforms and specialty construction lenders.

The bar for out-of-state development is mid-to-high-20s IRR — the fresh land basis helps clear it.

THE STRUCTURE

A vehicle inside the H6 platform.

Accountable Equity's Capital H6 owns the land. Spin the developable parcels into a development company — the property contributes the land, the dev co (Bob · JAL · partners) entitles and sells the lots, and profit splits 50/50.

QUEENSTOWN HARBOR LAND PARTNERS, LLC

Working name

Development company under Capital H6

LAND = EQUITY

Owned

Developable acreage contributed by Capital H6 at appraised value — just acquired, at a low basis.

CAPITAL STACK

Illustrative

Land	**Contributed**
Horizontal	**Builder-funded**
Soft costs	**Dev co funds**

ROLES

Josh McCallen / VIVÂMEE

Resort owner-operator

Bob Connell / Accountable Equity

Development lead · Capital H6 GP

JAL Strategies

Dev-co member — entitlement, capital formation & sales

JAL is a member of the development company — earning a share of its 50% (plus a $15K/mo retainer); intends to invest, sized in diligence.

ENGAGEMENT · FOR DISCUSSION

How I'd want to be engaged.

You asked how I'd like to be comped. My preference matches yours — a small base to fund the work, then real alignment on the value we create. For discussion only.

Hybrid

$15K/mo + expenses, then 30% of the dev-co 50% (the carry)

Aligned to value created — and I intend to contribute capital to the dev co myself (amount sized in diligence).

Aligned upside

Component	Terms	What it covers
1 · Advisory retainer	**$15K / mo**	Funds the work during entitlement — a floor; a cost to the deal, not netted from the carry
2 · Expenses	**Reimbursed at cost**	Travel, survey, market & entitlement studies — billed separately
3 · Capital placement fee	**1% debt · 2% equity**	On outside capital I place — small on capital-light Queenstown, real on the pipeline's acquisition equity
4 · Profit share (carry)	**30% of dev-co 50%**	≈ ~$2.1M on the Queenstown base case (~15% of profit); Bob & partners take the balance
= Illustrative all-in (base case)	**~$2.7M**	~$2.1M carry + ~$0.5M retainer (~3 yrs) — ~19% of profit, mostly the contingent carry

Aligned, not double-dipping: the retainer is a floor, placement fees only on outside capital I raise, and the carry (30% of the dev-co 50%) is the prize — most of the ~$2.7M is contingent on the upside.

WHY JAL AS YOUR PARTNER

Pedigree. Relationships. Operator.

Institutional capital-markets pedigree, an active investor network, and hands-on development & asset-management experience.

JUSTIN A. LEVINE

Founder & CEO, JAL Strategies

$6.1B career transaction volume ($5.5B Blackstone + $600M Levcor)

$600M debt + equity allocated across 26 CRE deals at Levcor

3.9M SF TX + NC retail managed at Levcor (2014–2025)

20+ years CRE operating, capital markets & asset management

CAREER ARC

LEVCOR, INC.

President 2024–2025; CIO 2021–2024; VP 2014–2021. $600M / 3.9M SF TX + NC retail portfolio; realized 4.13x / 16.1% IRR on six dispositions.

THE BLACKSTONE GROUP

THE PATH

From this call to a signed mandate.

Light and fast — diligence now, a Zoom shortly, then an in-person at Renault (near Atlantic City) in late July or early August, working around my July 15 surgery; then a defined mandate.

STAGE 1
DILIGENCE & DATA
Now – July · Review & analysis

- Confirm developable vs. conservation acreage (survey + easements)
- Pull entitlement & zoning status (Queen Anne's Co. + Renault township)
- Model entitled-lot yield, pricing & absorption
- Confirm the property / dev-co contribution & 50/50 mechanics

STAGE 2
IN PERSON
Late Jul / early Aug · Walk Renault

- Zoom shortly to align on structure & the first parcels
- Meet Bob & Josh; walk Renault (near Atlantic City)
- Around my July 15 surgery — I'm in NY through Aug 14
- See the other assets in the pipeline

STAGE 3
MANDATE
H2 2026 · Engage & execute

- Stand up the development company
- Launch entitlements + soft-cost budget (capital-light)
- Open builder conversations (incl. Cole)
- First entitled-lot sales underwritten

What I need: surveys / site plans (you have Renault's; Josh has the rest) · entitlement & zoning status · the 50/50 terms · target timeline. Happy to sign an NDA.

THANK YOU

Bob — appreciate the call, and the résumé read.

Looking forward to monetizing the land with you, Josh and the H6 team — let's find time at Renault in late July or early August.

Justin A. Levine | jlevine@jalstrategies.com | JAL Strategies
