JAL STRATEGIES

Disciplined Real Estate Investing, Development & Capital Formation

QUEENSTOWN HARBOR

Land Development & Lot-Monetization Partnership

Entitling and monetizing the developable land around the River & Lakes courses

Queenstown, Maryland · Eastern Shore · 36 holes on the Chesapeake

Preliminary discussion document — not a final proposal or commitment. Figures compiled from public sources and independent research; subject to change and confirmation in further conversations.

THE OPPORTUNITY

You just bought it. Now monetize the land.

Bob — Capital H6 just closed Queenstown Harbor. The resort runs itself; the upside is the developable land around the 36 holes — entitle it, sell lots to builders, recycle the proceeds.

$25M	**Just acquired (May 2026)** Queenstown + South River, via Capital H6
36 holes	**River & Lakes courses** Waterfront resort on the Eastern Shore
870+ ac	**Across the two properties** Waterfront + conservation land (to verify)
Soft costs	**To begin** Builders fund the horizontal infrastructure

WHY NOW

You own it free and clear — Capital H6 just closed the purchase.

Fresh, low basis: $25M for two courses across 870+ acres — the land value is the upside.

Builders fund sewer, roads and utilities — you carry approvals, not construction risk.

Minutes over the Bay Bridge to Annapolis; ~1 hour to D.C. & Baltimore.

Golf and water frontage on the Chesapeake commands a premium — and sells quickly.

Sources (own research; subject to change & confirmation): Club + Resort Business · Eye On Annapolis

THE ASSET

Queenstown Harbor, by the numbers.

A 36-hole waterfront destination on Maryland's Eastern Shore — acquired from The Brick Companies in May 2026, with established golf, an event venue and cottages already in place.

River	**Course · par 72** Lindsay Ervin design · 7,096 yds · opened 1991
Lakes	**Course · par 71** Lindsay Ervin design · 6,569 yds · opened 1996
310	**Links Lane, Queenstown MD** Chester River at the Chesapeake Bay
$25M	**Acquired with South River** From The Brick Companies · via Capital H6

ALREADY IN PLACE

An operating resort — not a raw land play.

River House & Tavern — newly renovated wedding, event and corporate venue.

On-site cottages — existing overnight lodging and a hospitality base.

36 holes of championship golf since 1991 — traffic, brand and demand already here.

198 acres under permanent conservation — stewardship credibility, and an envelope to plan around.

Sources (own research; subject to change & confirmation): qhgolf.com · GolfDigest · VisitMaryland

THE LAND BANK

The upside is the land around the golf.

The resort operates; the value-creation is entitling the developable, non-conservation acreage and selling finished lots to homebuilders. Capital-light, and additive to the hospitality.

870+ ac	**Portfolio land**	Across Queenstown + South River
198 ac	**Under conservation**	Permanent easement at Queenstown — plan around it
~140 ac	**Developable land**	Net of conservation, wetlands & course (to verify)
~280	**Entitled lots**	Sold to regional homebuilders

THE THESIS

Monetize the land the golf doesn't need.

Identify developable parcels at the course edges — away from conservation, wetlands and play.

Entitle for residential; sell finished lots to builders who fund the horizontal work.

Golf-frontage and water-view lots command premium pricing and faster absorption.

Recycle proceeds into the broader Capital H6 program — including South River.

Sources (own research; subject to change & confirmation): Club + Resort Business · qhgolf.com/who-we-are

THE PLAYBOOK

Four moves that turn land into cash.

Capital-light by sequence — soft costs first, then builders carry the infrastructure and construction risk, and the proceeds recycle into the next parcel.

01

Entitle

Approvals for lots

Secure zoning and subdivision approvals for the developable acreage around the fairways.

02

Sell to Builders

Finished lots → homebuilders

Sell entitled lots to regional builders and let them fund sewer, roads and utilities.

03

Golf & Water Premium

Frontage sells higher

Lots on a course or with Chesapeake water views command a premium and absorb faster.

04

Recycle & Repeat

Parcel by parcel

Roll proceeds into the next parcel — and seed the broader Capital H6 program.

Move 01 is mostly soft costs — the fastest path to proof, and to first cash.

THE MATH · ILLUSTRATIVE

From 700 acres to ~$17M of entitled-lot value.

Capital-light, entitled-lot basis: the JV sells entitled lots and the homebuilder funds the horizontal. Each lot equals the finished-lot price less the builder's horizontal cost and margin. Illustrative — survey-dependent.

Step	Basis	Calculation	= Result
Gross Queenstown land	per ownership (to confirm)	—	**~700 ac**
Less permanent conservation	recorded easement	700 - 198	**502 ac**
Less golf, range, water & lodging	two 18s + 9-ac range + cottages	502 - ~300	**~200 ac**
Less Critical Area & wetlands	Chesapeake 1,000-ft zone	200 - ~60	**~140 ac**
Entitled lots	~2.0 lots / acre	140 × 2.0	**~280 lots**
Value per entitled lot	builder funds the horizontal	$150K - $60K - $22K	**~$68K**
Gross land proceeds	paid by the homebuilder	280 × $68K	**$19.0M**
Less JV soft costs (~10%)	entitlement · legal · broker	× 0.90	**≈ $17M**

≈ $17M net to the JV — capital-light: the homebuilder funds the horizontal, so only entitlement & soft costs come out.

Sources (own research; subject to change & confirmation): qhgolf.com/who-we-are · Queen Anne's Co. — Critical Area · MD DNR — Critical Area

WHY IT SELLS

These lots sell — here's why.

Course and water frontage, Bay Bridge proximity, and builder appetite for entitled lots all push price and absorption. We're meeting demand that already exists.

Driver	Detail	Why it lifts value
Golf & water frontage	Lots on the River / Lakes courses & Chester River	Premium pricing and faster absorption vs. a raw subdivision
Bay Bridge location	Minutes to Annapolis; ~1 hr to D.C. & Baltimore	Commuter, second-home and weekend demand from three metros
Chesapeake scarcity	Limited new waterfront-adjacent lots on the Shore	High barriers → durable, premium lot values
Builder appetite	Regional homebuilders want entitled / finished lots	They pay to avoid entitlement risk — and fund the infrastructure
Fresh owned basis	$25M for 870+ ac just closed	Low land basis → development margin starts higher

Sources (own research; subject to change & confirmation): distance-cities.com · Queen Anne's Co. — Critical Area

Demand is already here — we're entitling supply to meet it, not creating a market.

THE SISTER ASSET

South River — the Annapolis-side anchor.

Acquired in the same $25M Capital H6 deal: an established 18-hole private club near Annapolis with 600+ member families — a membership and events engine, and the next place to run the playbook.

18 holes	**Private club (Brian Ault, 1996)**	Edgewater, MD — on the South River
600+	**Member families**	Recurring dues + a built-in events base
165 ac	**Club grounds**	8 lakes · 14 environmentally protected areas
Same deal	**Part of the $25M H6 buy**	One platform, two assets

THE ANGLE

Membership and events first; land where diligence supports it.

600+ member families — recurring dues, plus an events / dining base to grow.

Annapolis-side, west of the Bay — an affluent, supply-constrained catchment.

The Bistro, fitness, simulator lounge & range already drive non-golf revenue.

Assess limited parcel entitlement without disturbing the member experience.

Sources (own research; subject to change & confirmation): golfclubsr.com · foretee.com · Club + Resort Business

CAPITAL STRATEGY

Capital-light by design.

The land bank barely needs capital: soft costs to entitle, then builders fund the horizontal work and buy the lots. Cash in is small; proceeds come fast.

$1–3M

Soft costs to start

Entitlements, planning & approvals

Land

= the equity

Acreage held by Capital H6 — already acquired

THE PRINCIPLE

You carry approvals, not construction.

Builders take the infrastructure burden — sewer, roads, utilities — and pay for finished lots. Your cash at risk stays small and staged.

Phase	Approach	Your capital	Who funds
Phase 1 — Entitle	Approvals for lots	**$1–3M**	JAL + H6 dev co (skin in the game)
Phase 2 — Builder takedown	Horizontal + lot purchase	**~$0 to you**	Regional homebuilder funds & buys
Phase 3 — Recycle	Proceeds redeployed	**Self-funding**	Next parcel / South River / H6 program

Minimal capital at risk — and the land bank seeds everything that comes after.

PRO FORMA · ILLUSTRATIVE

The budget, and the returns.

A capital-light, entitled-lot merchant model: Capital H6 contributes the land, a small equity raise funds entitlement, and ~280 lots sell to a homebuilder who funds the horizontal. Illustrative — for discussion.

USES OF CAPITAL	
Land contribution (~140 dev. ac)	**$4.0M**
Entitlement, civil & environmental	**$1.1M**
Legal, zoning & approvals	**$0.4M**
Marketing & brokerage (~3%)	**$0.6M**
Predevelopment carry & financing	**$0.2M**
Contingency	**$0.2M**
TOTAL PROJECT COST	**$6.5M**

SOURCES OF CAPITAL	
Land equity (H6)	**$4.0M**
Cash equity (JAL + LP)	**$2.0M**
Predev facility	**$0.5M**
TOTAL	**$6.5M**

KEY ASSUMPTIONS

$68K net / lot · ~280 lots over Yr 2–4 · builder funds horizontal · 8% pref + co-GP promote · land at appraised value

RETURNS

$19.0M
Gross lot revenue

$12.5M
Net development profit

~3.0×
Equity multiple

~32%
Project IRR (phased)

~24%
LP IRR (after promote)

Illustrative: ~$12.5M profit on ~$6.5M cost — ~3.0× equity, ~32% project IRR. Builder funds the horizontal; JAL co-invests.

Illustrative pro forma for discussion only — basis and sources on the following slide; figures subject to confirmation.

What the pro forma assumes — and why.

Every input, its value, and the reasoning. Market figures are from public sources; deal-specific figures (acreage, land basis, density) are to be confirmed in diligence.

Assumption	Value	Basis / reasoning
Net developable acreage	**~140 ac**	700 gross − 198 conservation − ~300 golf − ~60 Critical Area; survey to confirm
Lot density	**~2.0 / ac**	Blended for the developable (non-Critical-Area) land; Queen Anne's County zoning to confirm
Finished lot value	**$150K**	Conservative — QAC building lots average ~$237K; new homes $600–705K (lot ≈ 24% of home)
Builder-funded horizontal	**$60K / lot**	Per-lot land-development benchmark; residential development runs $50–150K / acre
Builder margin	**~$22K (15%)**	Standard return for the builder to carry entitled lots through to finished
JV soft costs	**~10%**	Entitlement, civil & environmental, legal / zoning and brokerage
Land basis (contributed)	**~$4.0M**	Allocated from the $25M H6 purchase (~$29K / ac); joint appraisal to set
Waterfall	**8% pref · co-GP**	Standard JV promote structure — for discussion

Sources (own research; subject to change & confirmation): Land.com — QAC lots · Zillow — QAC new homes · HomeGuide — land dev cost · Club + Resort Business

LOT LIQUIDITY · BUYER UNIVERSE

A deep pool of lot buyers.

Regional and national homebuilders are actively building across Queen Anne's County and the Eastern Shore. Entitled, finished lots trade readily — multiple credible takeout buyers let us run a competitive process and de-risk the exit.

Builder	Reach	Footprint / relevance
NVR / Ryan Homes	**National · public**	Largest builder in Maryland; routine acquirer of finished / entitled lots
D.R. Horton	**National · public**	#1 U.S. homebuilder; active Maryland operations
Lennar	**National · public**	Top-3 U.S. builder; Maryland division
Lacrosse Homes	**Regional**	Centreville, Queen Anne's Co. — Meadow Creek, Kent Island Estates
Caruso Homes	**Regional**	Eastern Shore communities + build-on-your-lot across Maryland
Gemcraft Homes	**Regional**	Mid-Atlantic production builder (MD · DE · VA · PA)
Bay to Beach · Baldwin Homes	**Regional · custom**	Eastern Shore custom / semi-custom builders

Multiple well-capitalized buyers = a liquid exit — phased lot takedowns or a bulk sale, marketed competitively.

Sources (own research; subject to change & confirmation): Lacrosse Homes (Centreville, QAC) · Caruso Homes · Gemcraft Homes · Zillow — MD new communities

CAPITAL ACCESS

I bring the capital relationships.

When a parcel does call for equity or debt — or to move faster — here's the access. Active mandates, not a paper Rolodex.

$15M
Equity being raised now
Houston retail — family-office capital, closing summer 2026

$19.5M
Debt already secured
Lender committed on the same transaction

Mid-20s%
Target development IRR
Investors expect mid-to-high 20s out-of-state

$6.1B
Career transaction volume
Across debt & equity — Blackstone + Levcor

THE NETWORK

Where I place capital — equity and debt.

Family offices (Texas) — my core equity base; they'll travel for the right risk-adjusted return.

Institutional equity — Angelo Gordon and peer private-equity relationships.

National debt — Goldman Sachs (met two weeks ago; national platform, Dallas team) + specialty lenders.

The bar for out-of-state development is mid-to-high-20s IRR — the fresh land basis helps clear it.

THE STRUCTURE

A vehicle inside the H6 platform.

Capital H6 owns the land. Spin the developable parcels into a land-development entity — H6 contributes the acreage as equity; JAL co-invests and runs entitlement, capital and lot sales alongside your team.

QUEENSTOWN HARBOR LAND PARTNERS, LLC

Working name

Land-development vehicle under Capital H6

LAND = EQUITY

Owned

Developable acreage contributed by Capital H6 at appraised value — just acquired, at a low basis.

CAPITAL STACK

Development lead (H6 GP)

JAL Strategies

Capital, entitlement & sales — co-invests

JAL takes skin in the game — co-investing alongside, not just advising.

ENGAGEMENT · FOR DISCUSSION

How I'd want to be engaged.

You asked how I'd like to be comped. My preference matches yours — a small base to fund the work, then real alignment on the value we create. For discussion only.

Hybrid

$15K/mo + expenses, then success fees + carry

Aligned to lot-sale value created — not a flat consulting check.

Skin in the game

Component	Terms	What it covers
Advisory retainer	**$15K / mo**	Funds entitlement, underwriting & capital sourcing during an initial term; creditable against success fees
Expenses	**Reimbursed at cost**	Travel, survey, market & entitlement studies — billed separately, not netted from fees
Capital placement fee	**1% debt · 2–3% equity**	Success fee if and when we place debt or equity for a parcel
Carried interest	**Co-GP promote**	Share of value created on lot sales; JAL co-invests its own capital alongside

The structure flexes to the deal — the point is alignment: I win when you win.

WHY JAL AS YOUR PARTNER

Pedigree. Relationships. Operator.

Institutional capital-markets pedigree, an active investor network, and hands-on development & asset-management experience.

JUSTIN A. LEVINE

Founder & CEO, JAL Strategies

$6.1B	career transaction volume ($5.5B Blackstone + $600M Levcor)
$600M	debt + equity allocated across 26 CRE deals at Levcor
3.9M SF	TX + NC retail managed at Levcor (2014–2025)
20+ years	CRE operating, capital markets & asset management

CAREER ARC

LEVCOR, INC.

President 2024–2025; CIO 2021–2024; VP 2014–2021. $600M / 3.9M SF TX + NC retail portfolio; realized 4.13x / 16.1% IRR on six dispositions.

THE BLACKSTONE GROUP

Analyst / Associate 2006–2011, NYC. Capital raising for U.S., Asia & India funds; $2.5B raised; ~$5.5B aggregate transaction volume.

JAL-JCP REAL ESTATE

Co-Founder. Partnership with JCP Investment Management ($250M+ AUM, SEC-registered). Below-replacement-cost unanchored strip centers.

ULI HOUSTON

Chair, District Council Management Committee 2022–2024. ULI Americas Mixed-Use & Retail Councils. Member since 2015.

M.B.A., The Wharton School, University of Pennsylvania. B.S. Economics + Communication Studies, Northwestern University.

THE PATH

From this call to a signed mandate.

Light and fast to start — diligence now, an in-person while I'm in the Northeast in July, then a defined engagement on the first parcels.

STAGE 1
DILIGENCE & DATA
Now – July · Review & analysis

- Confirm developable vs. conservation acreage (survey + easements)
- Pull entitlement & zoning status (Queen Anne's County)
- Model lot yield & absorption for the developable parcels
- Confirm the H6 ownership & contribution mechanics

STAGE 2
IN PERSON
July 2026 · Walk the site

- Meet while I'm in the NY / Philly area — train down or drive to the Shore
- Walk Queenstown (River House & the course edges)
- Meet Josh / VIVÂMEE
- Align on first parcels, capital plan & comp

STAGE 3
MANDATE
H2 2026 · Engage & execute

- Stand up the land vehicle under Capital H6
- Launch Phase 1 entitlements + soft-cost budget
- Open regional-homebuilder conversations
- First entitled-lot sales underwritten

What I need to sharpen the model: survey / plat & conservation easements · entitlement & zoning status · H6 structure · target timeline.

THANK YOU

Bob — appreciate the call, and the résumé read.

Looking forward to monetizing the land around Queenstown Harbor with you, Josh and the H6 team — let's find time in July.

Justin A. Levine | jlevine@jalstrategies.com | JAL Strategies
