Disciplined Real Estate Investing, Development & Capital Formation

QUEENSTOWN HARBOR

Land Development & Lot-Monetization Partnership

Entitling and monetizing the developable land around the River & Lakes courses

Queenstown, Maryland · Eastern Shore · 36 holes on the Chesapeake

Preliminary discussion document — not a final proposal or commitment. Figures compiled from public sources and independent research; subject to change and confirmation in further conversations.

THE OPPORTUNITY

You just bought it. Now monetize the land.

Bob — Capital H6 just closed Queenstown Harbor. The resort runs itself; the upside is the developable land around the 36 holes — entitle it, sell lots to builders, recycle the proceeds.

\$25M

Just acquired (May 2026)

Queenstown + South River, via Capital H6

36 holes

River & Lakes courses

Waterfront resort on the Eastern Shore

870+ ac

Across the two properties

Waterfront + conservation land (to verify)

Soft costs

To entitle

Phase 1 is light; we fund the horizontal next

WHY NOW

You own it free and clear — Capital H6 just closed the purchase.

Fresh, low basis: \$25M for two courses across 870+ acres — the land value is the upside.

We develop the lots — roads, sewer and utilities — and sell them finished, capturing the full lot value.

Minutes over the Bay Bridge to Annapolis; ~1 hour to D.C. & Baltimore.

Golf and water frontage on the Chesapeake commands a premium — and sells quickly.

Sources (own research; subject to change & confirmation): [Club + Resort Business](#) · [Eye On Annapolis](#)

THE ASSET

Queenstown Harbor, by the numbers.

A 36-hole waterfront destination on Maryland's Eastern Shore — acquired from The Brick Companies in May 2026, with established golf, an event venue and cottages already in place.

River

Course · par 72

Lindsay Ervin design · 7,096 yds · opened 1991

Lakes

Course · par 71

Lindsay Ervin design · 6,569 yds · opened 1996

310

Links Lane, Queenstown MD

Chester River at the Chesapeake Bay

\$25M

Acquired with South River

From The Brick Companies · via Capital H6

ALREADY IN PLACE

An operating resort — not a raw land play.

River House & Tavern — newly renovated wedding, event and corporate venue.

On-site cottages — existing overnight lodging and a hospitality base.

36 holes of championship golf since 1991 — traffic, brand and demand already here.

198 acres under permanent conservation — stewardship credibility, and an envelope to plan around.

Sources (own research; subject to change & confirmation): [ghgolf.com](#) · [GolfDigest](#) · [VisitMaryland](#)

The upside is the land around the golf.

The resort operates; the value-creation is entitling and developing the non-conservation acreage and selling finished lots to homebuilders — capturing the full lot value, additive to the hospitality.

870+ ac	Portfolio land Across Queenstown + South River
198 ac	Under conservation Permanent easement at Queenstown — plan around it
~140 ac	Developable land Net of conservation, wetlands & course (to verify)
~280	Entitled lots Sold to regional homebuilders

THE THESIS

Monetize the land the golf doesn't need.

Identify developable parcels at the course edges — away from conservation, wetlands and play.

Entitle, then develop finished lots — we fund the roads, sewer and utilities; builders just build.

Golf-frontage and water-view lots command premium pricing and faster absorption.

Recycle proceeds into the broader Capital H6 program — including South River.

Sources (own research; subject to change & confirmation): [Club + Resort Business](#) · [qhgolf.com/who-we-are](#)

THE PLAYBOOK

Four moves that turn land into cash.

Phased — entitle first (soft costs), then we fund the horizontal and deliver finished lots, recycling proceeds into the next parcel.

01

Entitle

Approvals for lots

Secure zoning and subdivision approvals for the developable acreage around the fairways.

02

Sell to Builders

Finished lots → homebuilders

Develop finished lots — we fund the roads, sewer and utilities; the builder just builds the homes.

03

Golf & Water Premium

Frontage sells higher

Lots on a course or with Chesapeake water views command a premium and absorb faster.

04

Recycle & Repeat

Parcel by parcel

Roll proceeds into the next parcel — and seed the broader Capital H6 program.

Move 01 is mostly soft costs — the fastest path to proof, and to first cash.

THE MATH · ILLUSTRATIVE

From 700 acres to \$42M of finished-lot revenue.

Finished-lot basis: we develop the lots — funding roads, sewer and utilities — and sell them finished; the builder just builds the homes. Costs and returns are on the pro forma. Illustrative — survey-dependent.

Step	Basis	Calculation	= Result
Gross Queenstown land	per ownership (to confirm)	—	~700 ac
Less permanent conservation	recorded easement	700 - 198	502 ac
Less golf, range, water & lodging	two 18s + 9-ac range + cottages	502 - ~300	~200 ac
Less Critical Area & wetlands	Chesapeake 1,000-ft zone	200 - ~60	~140 ac
Finished lots	~2.0 lots / acre	140 × 2.0	~280 lots
Finished lot price	we deliver finished lots	to homebuilders	\$150K
GROSS LOT REVENUE	net profit & returns on the pro forma	280 × \$150K	\$42.0M

\$42.0M gross finished-lot revenue — we develop and deliver finished lots; builders just build. Net profit & returns on the pro forma.

Sources (own research; subject to change & confirmation): [qhgolf.com/who-we-are](#) · [Queen Anne's Co. — Critical Area](#) · [MD DNR — Critical Area](#)

WHY IT SELLS

These lots sell — here's why.

Course and water frontage, Bay Bridge proximity, and builder appetite for entitled lots all push price and absorption. We're meeting demand that already exists.

Driver	Detail	Why it lifts value
Golf & water frontage	Lots on the River / Lakes courses & Chester River	Premium pricing and faster absorption vs. a raw subdivision
Bay Bridge location	Minutes to Annapolis; ~1 hr to D.C. & Baltimore	Commuter, second-home and weekend demand from three metros
Chesapeake scarcity	Limited new waterfront-adjacent lots on the Shore	High barriers → durable, premium lot values
Builder appetite	Regional homebuilders want entitled / finished lots	They pay to avoid entitlement risk — and fund the infrastructure
Fresh owned basis	\$25M for 870+ ac just closed	Low land basis → development margin starts higher

Sources (own research; subject to change & confirmation): [distance-cities.com](#) · [Queen Anne's Co. — Critical Area](#)

Demand is already here — we're entitling supply to meet it, not creating a market.

THE SISTER ASSET

South River — the Annapolis-side anchor.

Acquired in the same \$25M Capital H6 deal: an established 18-hole private club near Annapolis with 600+ member families — a membership and events engine, and the next place to run the playbook.

18 holes

Private club (Brian Ault, 1996)

Edgewater, MD — on the South River

600+

Member families

Recurring dues + a built-in events base

165 ac

Club grounds

8 lakes · 14 environmentally protected areas

Same deal

Part of the \$25M H6 buy

One platform, two assets

THE ANGLE

Membership and events first; land where diligence supports it.

600+ member families — recurring dues, plus an events / dining base to grow.

Annapolis-side, west of the Bay — an affluent, supply-constrained catchment.

The Bistro, fitness, simulator lounge & range already drive non-golf revenue.

Assess limited parcel entitlement without disturbing the member experience.

Sources (own research; subject to change & confirmation): [golfclubsr.com](#) · [foretee.com](#) · [Club + Resort Business](#)

DEVELOPMENT PLAN

Entitle, develop, deliver finished lots.

Start light with entitlement (soft costs), then fund the horizontal — roads, sewer and utilities — and deliver finished lots. The builder just builds the homes, so we capture the full lot value.

\$1–3M

To entitle (Phase 1)

Light to start — before the horizontal

\$60K / lot

Horizontal we fund

Roads, sewer & utilities — lots delivered finished

THE PRINCIPLE

We control and capture the full lot.

We fund the roads, sewer and utilities and sell finished lots — capturing the builder's development margin and controlling quality, timing and absorption.

Phase	Approach	Capital	Who funds
Phase 1 — Entitle	Approvals for lots	\$1–3M	JAL + H6 (soft costs, light)
Phase 2 — Develop	Roads, sewer & utilities	~\$16.8M	Development loan + equity (we fund)
Phase 3 — Deliver	Sell finished lots	Self-funding	Builders build homes; proceeds recycle

We carry the development to finished lots — capturing the builder's margin and controlling quality, timing & absorption.

The budget, and the returns.

A finished-lot development: Capital H6 contributes the land, a development loan plus equity funds the horizontal, and we sell ~280 finished lots to homebuilders. Illustrative — for discussion.

USES OF CAPITAL		SOURCES OF CAPITAL		RETURNS
Land contribution (~140 dev. ac)	\$4.0M	Development loan (~60% LTC)	\$16.5M	
Horizontal site development (\$60K/lot)	\$16.8M	Land equity (H6)	\$4.0M	
Soft costs (entitle, civil, env, legal)	\$2.8M	Cash equity (JAL + LP)	\$7.0M	
Marketing & brokerage (~3%)	\$1.3M	TOTAL	\$27.5M	
Contingency (7% of hard)	\$1.2M	KEY ASSUMPTIONS \$150K finished lot · 280 lots · we fund the horizontal (\$60K/lot) · ~60% LTC loan · 8% pref + co-GP promote		
Financing / interest carry	\$1.4M			
TOTAL PROJECT COST	\$27.5M			

\$42.0M

Gross lot revenue

\$14.5M

Net development profit

~2.3×

Equity multiple

~24%

Project IRR (phased)

~20%

LP IRR (after promote)

Illustrative: ~\$14.5M profit on ~\$27.5M cost — ~2.3× equity, ~24% project IRR. We deliver finished lots; builders just build.

Illustrative pro forma for discussion only — basis and sources on the following slide; figures subject to confirmation.

What the pro forma assumes — and why.

Every input, its value, and the reasoning. Market figures are from public sources; deal-specific figures (acreage, land basis, density) are to be confirmed in diligence.

Assumption	Value	Basis / reasoning
Net developable acreage	~140 ac	700 gross – 198 conservation – ~300 golf – ~60 Critical Area; survey to confirm
Lot density	~2.0 / ac	Blended for the developable (non-Critical-Area) land; Queen Anne's County zoning to confirm
Finished lot price	\$150K	Conservative — QAC building lots average ~\$237K; new homes \$600–705K (lot ≈ 24% of home)
Horizontal site development	\$60K / lot	JV-funded — roads, sewer, utilities; national benchmark \$50–150K / acre
Soft costs	~\$2.8M	Entitlement, civil & environmental, legal / zoning and management
Development loan	~60% LTC	Standard land-development / A&D financing on the horizontal
Land basis (contributed)	~\$4.0M	Allocated from the \$25M H6 purchase (~\$29K / ac); joint appraisal to set
Waterfall	8% pref · co-GP	Standard JV promote structure — for discussion

Sources (own research; subject to change & confirmation): [Land.com](#) — QAC lots · [Zillow](#) — QAC new homes · [HomeGuide](#) — land dev cost · [Club + Resort Business](#)

A deep pool of lot buyers.

Regional and national homebuilders are actively building across Queen Anne's County and the Eastern Shore. Entitled, finished lots trade readily — multiple credible takeout buyers let us run a competitive process and de-risk the exit.

Builder	Reach	Footprint / relevance
NVR / Ryan Homes	National · public	Largest builder in Maryland; routine acquirer of finished / entitled lots
D.R. Horton	National · public	#1 U.S. homebuilder; active Maryland operations
Lennar	National · public	Top-3 U.S. builder; Maryland division
Lacrosse Homes	Regional	Centreville, Queen Anne's Co. — Meadow Creek, Kent Island Estates
Caruso Homes	Regional	Eastern Shore communities + build-on-your-lot across Maryland
Gemcraft Homes	Regional	Mid-Atlantic production builder (MD · DE · VA · PA)
Bay to Beach · Baldwin Homes	Regional · custom	Eastern Shore custom / semi-custom builders

Multiple well-capitalized buyers = a liquid exit — phased lot takedowns or a bulk sale, marketed competitively.

Sources (own research; subject to change & confirmation): [Lacrosse Homes \(Centreville, QAC\)](#) · [Caruso Homes](#) · [Gemcraft Homes](#) · [Zillow — MD new communities](#)

Phase 2 — add a hotel and restaurants.

VIVÂMEE-led resort; JAL as capital partner. An income / hold play — durable cash flow and a stabilized-value exit (lower IRR than the land, longer hold). The Phase 1 lots help fund and de-risk it; the resort lifts lot values.

DEVELOPMENT COST		STABILIZED NOI	YoC	RETURNS
Hotel (100 keys × \$325K)	\$32.5M	Hotel NOI	\$2.8M 8.6%	\$47.0M Total project cost
Restaurants (16K SF × \$550)	\$8.8M	Restaurant NOI	\$1.0M 11%	\$3.8M Stabilized NOI
Land — hospitality parcel	\$2.0M	STABILIZED NOI	\$3.8M 8.1%	8.1% Yield on cost
Soft / FF&E / pre-opening	\$3.7M	KEY METRICS Yield on cost 8.1% · cash-on-cash ~9.8% · exit ~\$54M @ 8% cap · ~60% LTC · VIVÂMEE operates, JAL = capital		~1.9× Equity multiple (7-yr)
TOTAL DEVELOPMENT COST	\$47.0M			~12% Project IRR (7-yr)

Illustrative: ~\$47M resort at ~8.1% yield on cost — ~1.9× / ~12% IRR over a 7-yr hold. VIVÂMEE operates; JAL brings the capital.

CAPITAL ACCESS

I bring the capital relationships.

When a parcel does call for equity or debt — or to move faster — here's the access. Active mandates, not a paper Rolodex.

\$15M

Equity being raised now

Houston retail — family-office capital, closing summer 2026

\$19.5M

Debt already secured

Lender committed on the same transaction

Mid-20s%

Target development IRR

Investors expect mid-to-high 20s out-of-state

\$6.1B

Career transaction volume

Across debt & equity — Blackstone + Levcor

THE NETWORK

Where I place capital — equity and debt.

Family offices (Texas) — my core equity base; they'll travel for the right risk-adjusted return.

Institutional equity — Angelo Gordon and peer private-equity relationships.

National debt — Goldman Sachs (met two weeks ago; national platform, Dallas team) + specialty lenders.

The bar for out-of-state development is mid-to-high-20s IRR — the fresh land basis helps clear it.

THE STRUCTURE

A vehicle inside the H6 platform.

Capital H6 owns the land. Spin the developable parcels into a land-development entity — H6 contributes the acreage as equity; JAL co-invests and runs entitlement, capital and lot sales alongside your team.

QUEENSTOWN HARBOR LAND PARTNERS, LLC

Working name

Land-development vehicle under Capital H6

LAND = EQUITY

Owned

Developable acreage contributed by Capital H6 at appraised value — just acquired, at a low basis.

JAL Strategies

Capital, entitlement & sales — co-invests

JAL takes skin in the game — co-investing alongside, not just advising.

How I'd want to be engaged.

You asked how I'd like to be comped. My preference matches yours — a small base to fund the work, then real alignment on the value we create. For discussion only.

Hybrid

\$15K/mo + expenses, then success fees + carry

Aligned to lot-sale value created — not a flat consulting check.

Skin in the game

Component	Terms	What it covers
Advisory retainer	\$15K / mo	Funds entitlement, underwriting & capital sourcing during an initial term; creditable against success fees
Expenses	Reimbursed at cost	Travel, survey, market & entitlement studies — billed separately, not netted from fees
Capital placement fee	1% debt · 2–3% equity	Success fee if and when we place debt or equity for a parcel
Carried interest	Co-GP promote	Share of value created on lot sales; JAL co-invests its own capital alongside

The structure flexes to the deal — the point is alignment: I win when you win.

WHY JAL AS YOUR PARTNER

Pedigree. Relationships. Operator.

Institutional capital-markets pedigree, an active investor network, and hands-on development & asset-management experience.

JUSTIN A. LEVINE

Founder & CEO, JAL Strategies

\$6.1B

THE PATH

From this call to a signed mandate.

Light and fast to start — diligence now, an in-person while I'm in the Northeast in July, then a defined engagement on the first parcels.

STAGE 1

DILIGENCE & DATA

Now – July · Review & analysis

- Confirm developable vs. conservation acreage (survey + easements)
- Pull entitlement & zoning status (Queen Anne's County)
- Model lot yield & absorption for the developable parcels
- Confirm the H6 ownership & contribution mechanics

STAGE 2

IN PERSON

July 2026 · Walk the site

- Meet while I'm in the NY / Philly area — train down or drive to the Shore
- Walk Queenstown (River House & the course edges)
- Meet Josh / VIVÂMEE
- Align on first parcels, capital plan & comp

STAGE 3

MANDATE

H2 2026 · Engage & execute

- Stand up the land vehicle under Capital H6
- Launch Phase 1 entitlements + soft-cost budget
- Open regional-homebuilder conversations
- First finished-lot sales underwritten

What I need to sharpen the model: survey / plat & conservation easements · entitlement & zoning status · H6 structure · target timeline.

THANK YOU

Bob — appreciate the call, and the résumé read.

Looking forward to monetizing the land around Queenstown Harbor with you, Josh and the H6 team — let's find time in July.

Justin A. Levine | jlevine@jalstrategies.com | JAL Strategies
