# QUEENSTOWN HARBOR

---

## Land Development & Lot-Monetization Partnership

Entitling and monetizing the developable land around the River & Lakes courses

Queenstown, Maryland · Eastern Shore · 36 holes on the Chesapeake

Preliminary discussion document — not a final proposal or commitment. Figures compiled from public sources and independent research; subject to change and confirmation in further conversations.

THE OPPORTUNITY

# You just bought it. Now monetize the land.

Bob — Capital H6 just closed Queenstown Harbor. The resort runs itself; the upside is the developable land around the 36 holes — entitle it, sell lots to builders, recycle the proceeds.

\$25M

Just acquired (May 2026)

Queenstown + South River, via Capital H6

36 holes

River & Lakes courses

Waterfront resort on the Eastern Shore

870+ ac

Across the two properties

Waterfront + conservation land (to verify)

Soft costs

To entitle

Phase 1 is light; we fund the horizontal next

WHY NOW

You own it free and clear — Capital H6 just closed the purchase.

Fresh, low basis: \$25M for two courses across 870+ acres — the land value is the upside.

We develop the lots — roads, sewer and utilities — and sell them finished, capturing the full lot value.

Minutes over the Bay Bridge to Annapolis; ~1 hour to D.C. & Baltimore.

Golf and water frontage on the Chesapeake commands a premium — and sells quickly.

Sources (own research; subject to change & confirmation): [Club + Resort Business](#) · [Eye On Annapolis](#)

THE ASSET

# Queenstown Harbor, by the numbers.

A 36-hole waterfront destination on Maryland's Eastern Shore — acquired from The Brick Companies in May 2026, with established golf, an event venue and cottages already in place.

River

Course · par 72

Lindsay Ervin design · 7,096 yds · opened 1991

Lakes

Course · par 71

Lindsay Ervin design · 6,569 yds · opened 1996

310

Links Lane, Queenstown MD

Chester River at the Chesapeake Bay

\$25M

Acquired with South River

From The Brick Companies · via Capital H6

ALREADY IN PLACE

## An operating resort — not a raw land play.

River House & Tavern — newly renovated wedding, event and corporate venue.

On-site cottages — existing overnight lodging and a hospitality base.

36 holes of championship golf since 1991 — traffic, brand and demand already here.

198 acres under permanent conservation — stewardship credibility, and an envelope to plan around.

Sources (own research; subject to change & confirmation): [qhgolf.com](#) · [GolfDigest](#) · [VisitMaryland](#)

# The upside is the land around the golf.

The resort operates; the value-creation is entitling and developing the non-conservation acreage and selling finished lots to homebuilders — capturing the full lot value, additive to the hospitality.

870+ ac

Portfolio land

Across Queenstown + South River

198 ac

Under conservation

Permanent easement at Queenstown — plan around it

~140 ac

Developable land

Net of conservation, wetlands & course (to verify)

~280

Entitled lots

Sold to regional homebuilders

THE THESIS

Monetize the land the golf doesn't need.

Identify developable parcels at the course edges — away from conservation, wetlands and play.

Entitle, then develop finished lots — we fund the roads, sewer and utilities; builders just build.

Golf-frontage and water-view lots command premium pricing and faster absorption.

Recycle proceeds into the broader Capital H6 program — including South River.

Sources (own research; subject to change & confirmation): [Club + Resort Business](#) · [qhgolf.com/who-we-are](http://qhgolf.com/who-we-are)

## THE PLAYBOOK

# Four moves that turn land into cash.

Phased — entitle first (soft costs), then we fund the horizontal and deliver finished lots, recycling proceeds into the next parcel.

## 01

### Entitle

Approvals for lots

Secure zoning and subdivision approvals for the developable acreage around the fairways.

## 02

### Sell to Builders

Finished lots →  
homebuilders

Develop finished lots — we fund the roads, sewer and utilities; the builder just builds the homes.

## 03

### Golf & Water Premium

Frontage sells higher

Lots on a course or with Chesapeake water views command a premium and absorb faster.

## 04

### Recycle & Repeat

Parcel by parcel

Roll proceeds into the next parcel — and seed the broader Capital H6 program.

Move 01 is mostly soft costs — the fastest path to proof, and to first cash.

THE MATH · ILLUSTRATIVE

# From 700 acres to \$42M of finished-lot revenue.

Finished-lot basis: we develop the lots — funding roads, sewer and utilities — and sell them finished; the builder just builds the homes. Costs and returns are on the pro forma. Illustrative — survey-dependent.

| Step                              | Basis                                 | Calculation     | = Result  |
|-----------------------------------|---------------------------------------|-----------------|-----------|
| Gross Queenstown land             | per ownership (to confirm)            | —               | ~700 ac   |
| Less permanent conservation       | recorded easement                     | 700 - 198       | 502 ac    |
| Less golf, range, water & lodging | two 18s + 9-ac range + cottages       | 502 - ~300      | ~200 ac   |
| Less Critical Area & wetlands     | Chesapeake 1,000-ft zone              | 200 - ~60       | ~140 ac   |
| Finished lots                     | ~2.0 lots / acre                      | 140 × 2.0       | ~280 lots |
| Finished lot price                | we deliver finished lots              | to homebuilders | \$150K    |
| GROSS LOT REVENUE                 | net profit & returns on the pro forma | 280 × \$150K    | \$42.0M   |

\$42.0M gross finished-lot revenue — we develop and deliver finished lots; builders just build. Net profit & returns on the pro forma.

Sources (own research; subject to change & confirmation): [qhgolf.com/who-we-are](#) · [Queen Anne's Co. — Critical Area](#) · [MD DNR — Critical Area](#)

WHY IT SELLS

# These lots sell — here's why.

Course and water frontage, Bay Bridge proximity, and builder appetite for entitled lots all push price and absorption. We're meeting demand that already exists.

| Driver                | Detail                                              | Why it lifts value                                               |
|-----------------------|-----------------------------------------------------|------------------------------------------------------------------|
| Golf & water frontage | Lots on the River / Lakes courses & Chester River   | Premium pricing and faster absorption vs. a raw subdivision      |
| Bay Bridge location   | Minutes to Annapolis; ~1 hr to D.C. & Baltimore     | Commuter, second-home and weekend demand from three metros       |
| Chesapeake scarcity   | Limited new waterfront-adjacent lots on the Shore   | High barriers → durable, premium lot values                      |
| Builder appetite      | Regional homebuilders want entitled / finished lots | They pay to avoid entitlement risk — and fund the infrastructure |
| Fresh owned basis     | \$25M for 870+ ac just closed                       | Low land basis → development margin starts higher                |

Sources (own research; subject to change & confirmation): [distance-cities.com](#) · [Queen Anne's Co. — Critical Area](#)

Demand is already here — we're entitling supply to meet it, not creating a market.

THE SISTER ASSET

# South River — the Annapolis-side anchor.

Acquired in the same \$25M Capital H6 deal: an established 18-hole private club near Annapolis with 600+ member families — a membership and events engine, and the next place to run the playbook.

18 holes

Private club (Brian Ault, 1996)

Edgewater, MD — on the South River

600+

Member families

Recurring dues + a built-in events base

165 ac

Club grounds

8 lakes · 14 environmentally protected areas

Same deal

Part of the \$25M H6 buy

One platform, two assets

THE ANGLE

Membership and events first; land where diligence supports it.

600+ member families — recurring dues, plus an events / dining base to grow.

Annapolis-side, west of the Bay — an affluent, supply-constrained catchment.

The Bistro, fitness, simulator lounge & range already drive non-golf revenue.

Assess limited parcel entitlement without disturbing the member experience.

Sources (own research; subject to change & confirmation): [golfclubsr.com](#) · [foretee.com](#) · [Club + Resort Business](#)

DEVELOPMENT PLAN

# Entitle, develop, deliver finished lots.

Start light with entitlement (soft costs), then fund the horizontal — roads, sewer and utilities — and deliver finished lots. The builder just builds the homes, so we capture the full lot value.

\$1–3M

To entitle (Phase 1)

Light to start — before the horizontal

\$60K / lot

Horizontal we fund

Roads, sewer & utilities — lots delivered finished

THE PRINCIPLE

We control and capture the full lot.

We fund the roads, sewer and utilities and sell finished lots — capturing the builder's development margin and controlling quality, timing and absorption.

| Phase             | Approach                 | Capital      | Who funds                              |
|-------------------|--------------------------|--------------|----------------------------------------|
| Phase 1 — Entitle | Approvals for lots       | \$1–3M       | Capital H6 (soft costs, light)         |
| Phase 2 — Develop | Roads, sewer & utilities | ~\$16.8M     | Development loan + equity (we fund)    |
| Phase 3 — Deliver | Sell finished lots       | Self-funding | Builders build homes; proceeds recycle |

We carry the development to finished lots — capturing the builder's margin and controlling quality, timing & absorption.

# The budget, and the returns.

A finished-lot development: Capital H6 contributes the land, a development loan plus equity funds the horizontal, and we sell ~280 finished lots to homebuilders. Illustrative — for discussion.

| USES OF CAPITAL                         |         | SOURCES OF CAPITAL                                                                                                                                                  |         | RETURNS |
|-----------------------------------------|---------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|---------|
| Land contribution (~140 dev. ac)        | \$4.0M  | Development loan (60% LTC)                                                                                                                                          | \$16.5M |         |

| Marketing & brokerage (~3%)             | \$1.3M  | TOTAL                                                                                                                                                               | \$27.5M |         |
| Contingency (7% of hard)                | \$1.2M  | <div>KEY ASSUMPTIONS</div> <div>\$150K finished lot · 280 lots · we fund the horizontal (\$60K/lot) · 60% LTC loan · 8% pref + tiered promote (see waterfall)</div> |         |         |
| Financing / interest carry              | \$1.4M  |                                                                                                                                                                     |         |         |
| TOTAL PROJECT COST                      | \$27.5M |                                                                                                                                                                     |         |         |

|                         |
|-------------------------|
| \$42.0M                 |
| Gross lot revenue       |
| \$14.5M                 |
| Net development profit  |
| ~2.3×                   |
| Project equity multiple |
| ~31%                    |
| Project IRR (levered)   |
| ~27%                    |
| LP IRR (after promote)  |

Illustrative: ~\$14.5M profit on ~\$27.5M cost — 60% LTC → ~2.3× equity, ~31% levered (27% LP after promote). We deliver finished lots; builders just build.

Illustrative pro forma for discussion only — basis and sources on the following slide; figures subject to confirmation.

# What the pro forma assumes — and why.

Every input, its value, and the reasoning. Market figures are from public sources; deal-specific figures (acreage, land basis, density) are to be confirmed in diligence.

| Assumption                  | Value           | Basis / reasoning                                                                           |
|-----------------------------|-----------------|---------------------------------------------------------------------------------------------|
| Net developable acreage     | ~140 ac         | 700 gross – 198 conservation – ~300 golf – ~60 Critical Area; survey to confirm             |
| Lot density                 | ~2.0 / ac       | Blended for the developable (non-Critical-Area) land; Queen Anne's County zoning to confirm |
| Finished lot price          | \$150K          | Conservative — QAC building lots average ~\$237K; new homes \$600–705K (lot ≈ 24% of home)  |
| Horizontal site development | \$60K / lot     | JV-funded — roads, sewer, utilities; national benchmark \$50–150K / acre                    |
| Soft costs                  | ~\$2.8M         | Entitlement, civil & environmental, legal / zoning and management                           |
| Development loan            | ~60% LTC        | Standard land-development / A&D financing on the horizontal                                 |
| Land basis (contributed)    | ~\$4.0M         | Allocated from the \$25M H6 purchase (~\$29K / ac); joint appraisal to set                  |
| Waterfall                   | 8% pref · co-GP | Standard JV promote structure — for discussion                                              |

# How the LP IRR is built.

A market structure: 8% preferred return, then a tiered promote. At 60% LTC the LP (90% of equity) nets ~27% after the promote; reaching the 30%+ range takes higher leverage or pricing (see the sensitivity). The GP — Capital H6, Bob & JAL + partners — earns the carry; JAL shares in it.

| PROMOTE WATERFALL                | LP / GP |
|----------------------------------|---------|
| 1 · Return of capital + 8% pref  | 90 / 10 |
| 2 · Promote — to a 15% LP IRR    | 80 / 20 |
| 3 · Promote — 15% to 20% LP IRR  | 70 / 30 |
| 4 · Promote — above a 20% LP IRR | 60 / 40 |

CAPITAL STACK · 60% LTC

\$27.5M cost = \$16.5M development loan (60%) + \$11M equity. Equity: LP 90% (\$9.9M) · GP — H6 · Bob · JAL + partners 10% (\$1.1M).

LP — EQUITY INVESTORS (90% of equity)

~27%

LP IRR after promote

\$9.9M invested

→ \$20.3M back

2.05× equity multiple

GP — SPONSOR GROUP (Capital H6 · Bob · JAL + partners)

~\$4.1M

GP promote / carry (group)

\$1.1M co-invest → \$5.2M

~59% GP IRR

JAL earns a share

Market 8% pref + tiered promote → the LP nets ~27% at 60% LTC; the GP (H6 · Bob · JAL + partners) earns ~\$4.1M of carry — JAL takes a share.

# How robust is the LP IRR?

LP IRR (after the promote) across finished-lot price and leverage. The base case — \$150K lots, 60% LTC — pencils to ~27%; the high-20s / low-30s is reachable with stronger pricing or modestly more leverage.

| LP IRR (lot price / LTC) | 55% LTC | 60% LTC | 65% LTC | 70% LTC |
|--------------------------|---------|---------|---------|---------|
| \$130K / lot             | 18.1%   | 19.7%   | 21.6%   | 23.9%   |
| \$150K / lot (base)      | 24.8%   | 26.8%   | 29.4%   | 32.8%   |
| \$170K / lot             | 30.7%   | 33.3%   | 36.5%   | 40.7%   |

Base (\$150K, 60% LTC) → ~27% LP. The 30%+ range is realistic — ~\$170K lots, or 65–70% LTC.

LP IRR after the 8% pref + tiered promote; each cell re-runs the full waterfall in the model. Illustrative — drivers in order of impact: lot price · LTC · absorption pace.

# A deep pool of lot buyers.

Regional and national homebuilders are actively building across Queen Anne's County and the Eastern Shore. Entitled, finished lots trade readily — multiple credible takeout buyers let us run a competitive process and de-risk the exit.

| Builder                      | Reach             | Footprint / relevance                                                     |
|------------------------------|-------------------|---------------------------------------------------------------------------|
| NVR / Ryan Homes             | National · public | Largest builder in Maryland; routine acquirer of finished / entitled lots |
| D.R. Horton                  | National · public | #1 U.S. homebuilder; active Maryland operations                           |
| Lennar                       | National · public | Top-3 U.S. builder; Maryland division                                     |
| Lacrosse Homes               | Regional          | Centreville, Queen Anne's Co. — Meadow Creek, Kent Island Estates         |
| Caruso Homes                 | Regional          | Eastern Shore communities + build-on-your-lot across Maryland             |
| Gemcraft Homes               | Regional          | Mid-Atlantic production builder (MD · DE · VA · PA)                       |
| Bay to Beach · Baldwin Homes | Regional · custom | Eastern Shore custom / semi-custom builders                               |

Multiple well-capitalized buyers = a liquid exit — phased lot takedowns or a bulk sale, marketed competitively.

Sources (own research; subject to change & confirmation): [Lacrosse Homes \(Centreville, QAC\)](#) · [Caruso Homes](#) · [Gemcraft Homes](#) · [Zillow — MD new communities](#)

# Phase 2 — add a hotel and restaurants.

VIVÂMEE-led resort; a 120-key resort & spa is already designed (FILLAT+ Architecture). JAL leads capital formation. Held for income it yields ~8% / ~12% IRR; to clear a mid-to-high-20s return we build to core, recapitalizing at stabilization (~Yr 4).

| DEVELOPMENT COST             | STABILIZED NOI | YoC                                                                                                                                                         | RETURNS                            |

| Restaurants (16K SF × \$550) | \$8.8M         | Restaurant NOI \$1.2M 14%                                                                                                                                   | \$4.7M<br>Stabilized NOI (premium) |
| Land — hospitality parcel    | \$2.0M         | STABILIZED NOI \$4.7M 9.9%                                                                                                                                  | 9.9%<br>Yield on cost              |
| Soft / FF&E / pre-opening    | \$3.7M         | KEY METRICS<br>Build-to-core: recap / sell ~Yr 4 · 7.5% exit cap → ~\$62M · 65% LTC · premium NOI (VIVÂMEE) · ~2.4-pt development spread · land contributed | ~2.3×<br>Equity multiple (~4-yr)   |
| TOTAL DEVELOPMENT COST       | \$47.0M        |                                                                                                                                                             | ~28%<br>Build-to-core IRR          |

Built to core (recap at stabilization), the hotel clears ~28% IRR / ~2.3×. Held for income it's ~12% — the spread is the contributed land + VIVÂMEE's premium NOI.

Sources (own research; subject to change & confirmation): [FILLAT+ — resort design](#) · [HVS — hotel dev cost 2025](#) · [hotel cap rates 2025](#) · [restaurant build cost](#)

# How robust is the hotel return?

Build-to-core IRR (65% LTC, recap at stabilization) across stabilized NOI and exit cap — the two biggest swing factors. Base (\$4.65M NOI, 7.5% cap) → ~28%; it holds in the mid-20s+ as long as NOI lands and caps stay sub-8%.

| BUILD-TO-CORE IRR (NOI / cap) | 7.0% cap | 7.5% cap | 8.0% cap | 8.5% cap |
|-------------------------------|----------|----------|----------|----------|
| \$4.2M NOI                    | 24.1%    | 19.8%    | 15.6%    | 11.6%    |
| \$4.65M NOI (base)            | 31.7%    | 27.6%    | 23.7%    | 19.9%    |
| \$5.15M NOI                   | 38.8%    | 34.8%    | 31.1%    | 27.5%    |

Base ~28%. Strong NOI + a sub-8% cap → low-to-high 30s; soft NOI or an 8.5% cap pulls it toward the high-teens / low-20s.

Build-to-core project IRR (65% LTC, recap ~Yr 4). VIVÂMEE-led; JAL leads capital formation. Each cell re-runs the model. Illustrative.

PHASE 1 · PRO FORMA CASH FLOW

# Phase 1 — pro forma cash flow.

Finished-lot development, project cash flow (\$M). Land and entitlement up front; the horizontal funds in Yr 1–2; lots sell Yr 2–4. Net profit ~\$14.5M. Illustrative.

| \$M                           | Yr 0  | Yr 1   | Yr 2   | Yr 3  | Yr 4  | Total  |
|-------------------------------|-------|--------|--------|-------|-------|--------|
| Lot revenue                   | —     | —      | 8.0    | 17.0  | 17.0  | 42.0   |
| Less: land contribution       | (4.0) | —      | —      | —     | —     | (4.0)  |
| Less: horizontal + soft costs | (2.0) | (10.4) | (9.9)  | (1.0) | (0.2) | (23.5) |
| Net project cash flow         | (6.0) | (10.4) | (1.9)  | 16.0  | 16.8  | 14.5   |
| Cumulative cash flow          | (6.0) | (16.4) | (18.3) | (2.3) | 14.5  |        |

Net profit ~\$14.5M · ~24% unlevered / ~31% levered project IRR · LP ~27% after the promote (60% LTC).

Project-level cash flow; illustrative phasing. Equity, leverage and the promote waterfall are on slides 10–13. Figures subject to confirmation.

# Phase 2 — pro forma cash flow.

Hospitality build-to-core, project cash flow (\$M). Develop Yr 0–2; stabilize, then recap / sell at ~Yr 4 (~\$62M @ a 7.5% cap). VIVÂMEE operates. Illustrative.

| \$M                    | Yr 0   | Yr 1   | Yr 2   | Yr 3   | Yr 4 | Total  |
|------------------------|--------|--------|--------|--------|------|--------|
| Net operating income   | —      | —      | 1.9    | 4.7    | 4.7  | 11.3   |
| Recap / sale proceeds  | —      | —      | —      | —      | 62.0 | 62.0   |
| Less: development cost | (15.0) | (20.0) | (12.0) | —      | —    | (47.0) |
| Net project cash flow  | (15.0) | (20.0) | (10.1) | 4.7    | 66.7 | 26.3   |
| Cumulative cash flow   | (15.0) | (35.0) | (45.1) | (40.4) | 26.3 |        |

Develops to ~cost; value is created at the recap / sale. Build-to-core (65% LTC) levered IRR ~28% / ~2.3× — see the Phase 2 sensitivity.

Project-level cash flow; illustrative phasing. A 120-key resort & spa is already designed (FILLAT+). Figures subject to confirmation.

# I bring the capital relationships.

When a parcel does call for equity or debt — or to move faster — here's the access. Active mandates, not a paper Rolodex.

\$15M

**Equity being raised now**

Houston retail — family-office capital, closing summer 2026

\$19.5M

**Debt already secured**

Lender committed on the same transaction

Mid-20s%

**Target development IRR**

Investors expect mid-to-high 20s out-of-state

\$6.1B

**Career transaction volume**

Across debt & equity — Blackstone + Levcor

THE NETWORK

**Where I place capital — equity and debt.**

Family offices (Texas) — my core equity base; they'll travel for the right risk-adjusted return.

Institutional equity — private-equity fund relationships.

National debt — Goldman Sachs (met two weeks ago; national platform, Dallas team) + specialty lenders.

The bar for out-of-state development is mid-to-high-20s IRR — the fresh land basis helps clear it.

THE STRUCTURE

# A vehicle inside the H6 platform.

Capital H6 owns the land. Spin the developable parcels into a land-development entity — H6 contributes the acreage as equity; JAL runs entitlement, capital formation and lot sales alongside your team.

## QUEENSTOWN HARBOR LAND PARTNERS, LLC

Working name

Land-development vehicle under Capital H6

### LAND = EQUITY

## Owned

Developable acreage contributed by Capital H6 at appraised value — just acquired, at a low basis.

### CAPITAL STACK

Illustrative

|                      |             |
|----------------------|-------------|
| Land equity          | Contributed |
| Builder-funded infra | Horizontal  |
| Cash equity          | Soft costs  |

### ROLES

#### Josh McCallen / VIVÂMEE

Resort owner-operator

#### Bob Connell / Capital H6

Development lead (H6 GP)

#### JAL Strategies

GP member — capital formation, entitlement & sales

JAL is a GP member — sharing the promote alongside Capital H6 and Bob, not just advising.

# How I'd want to be engaged.

You asked how I'd like to be comped. My preference matches yours — a small base to fund the work, then real alignment on the value we create. For discussion only.

Hybrid

\$15K/mo + expenses, then success fees + carry

Aligned to lot-sale value created — not a flat consulting check.

Aligned upside

| Component             | Terms               | What it covers                                                                         |
|-----------------------|---------------------|----------------------------------------------------------------------------------------|
| Advisory retainer     | \$15K / mo          | Funds entitlement, underwriting & capital sourcing during an initial term              |
| Expenses              | Reimbursed at cost  | Travel, survey, market & entitlement studies — billed separately, not netted from fees |
| Capital placement fee | 1% debt · 3% equity | Success fee if and when we place debt or equity for a parcel                           |
| Carried interest      | Share of GP promote | JAL's share of the GP promote (alongside H6, Bob & partners)                           |

The structure flexes to the deal — the point is alignment: I win when you win.

WHY JAL AS YOUR PARTNER

# Pedigree. Relationships. Operator.

Institutional capital-markets pedigree, an active investor network, and hands-on development & asset-management experience.

THE PATH

# From this call to a signed mandate.

Light and fast to start — diligence now, an in-person in July or August (I'm in the NYC area all of July and the first half of August), then a defined engagement on the first parcels.

STAGE 1

DILIGENCE & DATA

Now – July · Review & analysis

- Confirm developable vs. conservation acreage (survey + easements)
- Pull entitlement & zoning status (Queen Anne's County)
- Model lot yield & absorption for the developable parcels
- Confirm the H6 ownership & contribution mechanics

STAGE 2

IN PERSON

July / Aug 2026 · Walk the site

- Meet Bob in July or August — I'm in the NYC area all of July & the first half of August
- Walk Queenstown (River House & the course edges)
- Meet Josh / VIVÂMEE
- Align on first parcels, capital plan & comp

STAGE 3

MANDATE

H2 2026 · Engage & execute

- Stand up the land vehicle under Capital H6
- Launch Phase 1 entitlements + soft-cost budget
- Open regional-homebuilder conversations
- First finished-lot sales underwritten

What I need to sharpen the model: survey / plat & conservation easements · entitlement & zoning status · H6 structure · target timeline.

# THANK YOU

---

**Bob — appreciate the call, and the résumé read.**

Looking forward to monetizing the land around Queenstown Harbor with you, Josh and the H6 team — let's find time in July.
